

WELCOME HOME TROOPS!

From the Company That Reduces Our Dependence on Foreign Oil

Industry tests have shown improvement in fuel economy of up to 8.2% in Class 8 trucks which have been switched to AMSOIL synthetic oil and drivetrain fluids. Passenger car motorists report typical improvements of 2-5% in miles per gallon. If every vehicle in America switched to AMSOIL we'd save billions of gallons of fuel in a single year.

But there is another way AMSOIL helps reduce oil usage. AMSOIL synthetic motor oils are designed for extended service life – up to 25,000 miles or one year. Fewer oil changes means less oil consumed and less oil to dispose of, which is also better for our environment.

You've done your part, we're doing ours.
