

Got Snow?

You need the two-stroke oil specifically designed for snowmobiling.

AMSOIL Interceptor offers superior overall lubrication for recreational two-cycle equipment in both hot and cold temperature extremes and confidence that when you're out on the trail you'll get home at the end of the day.

Recommended for use as an injector oil or as 50:1 pre-mix, Interceptor is compatible with most mineral and synthetic two-cycle oils and offers the following benefits:

- Excellent exhaust power valve performance
- Superior wear control of cylinders, pistons and bearings
- Greatly reduced combustion chamber and piston deposits
- Produces low smoke/low odor emissions
- Provides rust protection

For the ultimate in wear protection and extremely clean operation, choose AMSOIL.

Interceptor is the 2-cycle oil of choice for all carbureted, Electronic Fuel Injected (EFI), and Direct Fuel Injected (DFI) snowmobiles, personal watercraft, motorcycles, ATVs and jet boats.

For racing applications choose **Dominator** Synthetic 2-Cycle Racing Oil for unsurpassed protection in high performance two-cycle motors, both on and off the track.

AMSOIL Synthetic 2-Cycle Oils are recommended wherever API TC and JASO FC two-cycle oils are specified.
