

The "Peace of Mind" Motor Oils

As car manufacturers continue to push for oil change intervals beyond the 3,000 mile mark, many consumers are concerned. Can they trust their owners' manuals or oil life monitoring systems that tell them to change their oil at 7,000, 8,000 or even 12,000 miles? Can the oil they are using provide such long term protection?

AMSOIL XL Synthetic Motor Oils can. AMSOIL provides peace of mind for motorists who are new to extended oil change intervals.

- Available in 5W-20, 5W-30, 10W-30 and 10W-40 formulations
- Meet API SM, ILSAC GF-4 specifications
- Reduce energy loss for optimum fuel efficiency
- Maintain low exhaust emissions and protect catalytic converters against deposits
- Provide optimum engine protection in temperature extremes
- Promote clean engine operation for longer lasting, better running engines
- Reduce oil change costs and keep the environment clean
