

BOATERS DISCOVER TOTAL PROTECTION WITH AMSOIL

Offer your customers total engine protection with the AMS-Oiler™ Precharger from AMSOIL

The AMS-Oiler™ provides the benefit of increased engine protection when they are most vulnerable, at engine start-up. This streamlined, self-contained oil pre-charger injects pressurized oil on engine bearings and sensitive wear surfaces the moment you turn the key. Extend the engine's life with AMSOIL synthetic oils and an AMS-Oiler™. Compact size, each unit less than 8" in length.

The AMS-Oiler™ Oil Precharger effectively puts an end to dry-engine starting. Motor oil is injected directly on the engine bearings and other wear-sensitive surfaces upon turning the ignition key. Its rugged construction withstands severe service and works reliably in any personal, commercial or industrial application. Outperforms gas- and air-charge systems. Mechanical life cycle exceeds one million engine starts, with no maintenance required.

The AMSOIL logo, featuring the word 'AMSOIL' in a stylized, italicized font. The letters 'A', 'M', 'S', and 'O' are red, while 'I', 'L', and 'I' are blue. The logo is outlined in white and has a registered trademark symbol (®) to its right.

The First in Synthetics®
