

Reduce Our Dependence On Foreign Oil With AMSOIL

Industry tests have shown improved economy of 2-5% in automobiles using synthetic lubricants. Many AMSOIL customer testimonials tell of even greater savings. If all cars in America used AMSOIL synthetic motor oil, gear lubes and drive train fluids, it would save up to 3.6 billion gallons of fuel in just one year.*

But there is another way to reduce oil usage. AMSOIL XL-7500 synthetic motor oils are designed for extended drain intervals and can reduce the amount of motor oil used by 60%. Fewer oil changes means less oil used, and less oil to dispose of.

Your customers save. America saves. And you make more money, too. Keep America on the road with AMSOIL.
