

Go the Distance

Best selling AMSOIL XL-7500 is now XL, the eXtended Life synthetic motor oil. Still recommended for 7500 mile/six month drain intervals, AMSOIL XL has been formulated for today's OEM-approved extended drain situations. Because GM vehicles equipped with oil light monitors no longer rely on designated drain intervals, some GM vehicles are now going eight, ten and twelve thousand miles before the oil

change light goes on. You want an oil that provides confident long drain performance... yet has been priced to deliver your full profit potential with every customer.

At AMSOIL we make lubricants your customers can depend on, whatever their driving conditions. Available in a full range of viscosities, AMSOIL XL is the one motor oil designed to go the distance.
