

AMSOIL Offers Mothers® High Performance Car Care Accessories

Following the initial introduction of Mothers products in December, AMSOIL is also adding the Mothers High Performance Car Care Accessory line. Mothers High Performance Car Care Accessories are a complete line featuring unique microfiber products, lightweight, ergonomic brushes and finishing products perfect for all car care enthusiasts. The Mothers High Performance Car Care Accessory line includes six task oriented brushes, four task oriented microfiber towels, microfiber applicator pads and a lambswool wash mit.

High Quality Brushes

Mothers offers a comprehensive collection of task oriented brushes designed to be comfortable to use. They fit nicely into the hand, are extremely lightweight and are clearcoat-safe and scratch-free to protect against marring of painted, chromed or polished surfaces. Mothers High Performance Car Care Brushes feature non-slip grips, lightweight ergonomic designs and protective rubber bumpers.

The line of brushes includes a Wheel Brush, Fender Well Brush, Brake Dust Brush, Tire Brush, Detail Brushes and an Interior/Upholstery Brush. The bristles on the Wheel Brush, Fender Well Brush and Detail Brushes are triple flagged for soft-

ness, whereas the bristles on the Brake Dust Brush are firmer to simplify the cleaning process. Similarly, the bristles on the Tire Brush and Interior Brush are very stiff to ease the cleaning process. All of the brushes should be rinsed frequently, as well as after use, to release trapped particles. All of the Mothers brushes were designed to be of the highest quality while still offering a great value.

Ultra-Soft™ Microfiber Towels and Pads

Mothers Ultra-Soft Microfiber Towels and Applicator Pads are perfect to dry, clean and apply dressings, detailer sprays or polish. The Ultra-Soft patented technology weaves microfiber in a unique way to create a much softer product than regular microfiber.

The four Microfiber towels were specifically designed for certain tasks. The Ultra-Soft Drying Towel offers a unique laminated design that features an ultra-soft waffle weave encapsulating a foam core. It is designed to hold over 10 times its weight in liquids and dries a car quickly and easily. The Ultra-Soft Quick Detail towel features an extra deep pile to trap and hold dirt. The Ultra-Soft Polishing Cloth has an edgeless design to prevent scratching and easily removes wax and polish residue, leaving vehicles clean and sparkling. Finally, the Wheel/Jamb Towel is a more durable waffle weave design for exceptionally demanding areas. All of the Mothers microfiber towels are clearcoat-safe and will not scratch.

Microfiber Applicator Pads

The Microfiber Ultra-Soft Applicator Pads are ideal for applying polishes, glazes and waxes safely, quickly and easily while ensuring even distribution through the unique weave pattern. These pads can also be used to apply rubber and vinyl protectants and dressings. MOTHERS® Ultra-Soft Microfiber Applicator Pads are lint-free, clearcoat-safe and will not harm painted, chromed or polished surfaces. To protect the finish of a vehicle and ensure optimal performance, hand or machine wash the products following each use.

Lambswool Wash Mit

The Genuine Lambswool Wash Mitt is the best way to pamper a vehicle's finish. The thick wool pile gently traps and removes dirt and debris and easily releases them when rinsed. Its handy "thumb" design with knitted cuff helps it keep hold while sudsing and is non-linting. After each use, the Mitt must be rinsed thoroughly and air dried away from direct sunlight to maintain optimum performance.

The Mothers High Performance Car Care Accessory line offers superior products for superior car care. Remember, There is No Shine Like Mothers.® See your local AMSOIL Dealer or the AMSOIL website, www.amsoil.com, for pricing information.
