

1996 GMC Sierra 1500

AMSOIL Dual Remote By-Pass Filter System
Submitted by Dealer Lewis Brown

I removed the plastic storage container from the driver's side front fender area. I fabricated a bracket from 1/8" x 2" steel angle and bolted it to the fender well along with an adjacent bracket. The oil pressure to the filter is from the engine oil cooler adapter pressure port. I removed the threaded plug and installed the appropriate brass fittings. I then routed the hose following the oil cooler lines to the radiator, then on to the filter. I used the AMSOIL BP-89 return line fitting.
