AMSOIL Dual Remote Filtration System
Submitted by Direct Jobber Jim Fleschner

I had a BMK-11 on this truck for a number of years, so I was concerned about loss of oil pressure. After I installed the new system using the existing 1/4 inch lines, I started it expecting the oil pressure to drop but it did not. Now that I have done this I'm sure it is safe to use this BMK30 on just about anything from a small pickup to a big rig. I have a shutoff valve under the hood in the pressure line so if it gets messed with I can get home.
