

After checking out other installs on the AMSOIL website, I decided to attach the BMK23 mount to the passenger-side frame rail under the radiator mount, just behind the bumper. I also installed a sample valve at the same time. The truck only has 82,000 kms (60,000 miles) on it now, so it will last a few more years with proper oil filtration. The truck has AMSOIL Signature Series 0W-30 Motor Oil (SSO) in the engine, Severe Gear Synthetic Gear Lubes in the differentials and AMSOIL Universal ATF in the transmission, transfer case and power steering, and I love it.
