By-Pass Filter Installation

2006 Dodge 2500 Cummins Diesel

AMSOIL Dual Remote By-Pass Filter System
Submitted by AMSOIL Dealer Brian Parker

I have just completed the installation of a BMK-11 on my 2006 Dodge 2500 Cummins Diesel pickup. I took a different approach and mounted the unit to a fabricated bracket that I mounted to a ledge on the intake side of the head. It is very stable and solid. I wanted to be able to show it off to prospective customers. I had the bracket powdercoated for an extra professional look. My contact is willing to mass produce if requested. I had it built to accept an EaBP-100, but it could be built taller to accept a 110 with no problem.
