AMSOIL Dual Remote By-Pass Filter System
Submitted by Bill Kinnett

I had to fashion a different bracket to give ample clearance and attached it to the frame. The bracket was made out of 4mm stainless steel, with the dimensions of 6.25" wide and 9.5" tall. A 2"x2" inner support was welded in at a 45 degree angle to add strength, but a 2" (W) x 4" (T) would have been better.
