

RACE REPORT 2 : COLISÉ DE QUEBEC AX

Last week-end it was Colisé de Quebec AX. Like a told you the week before, I had to work on my bike to get the best setting possible. So my bike was A1 for this race.

I had a really good day of racing. All night long, I had the best or the second best lap time. I finished 1st in my qualifier and 2<sup>nd</sup> in my semi final. I was more than confident to reach the podium for the final, even if I was in pain from a crash in my first practice.

In the final, I was second in the first corner. I made 4 laps there and I was studying Eric Nye and I was taking my time to past him at the good moment. At the 5th laps, Mason Phillips was following me and he decided it was easier to take me out of the race than to passed me. So the race was finish for me at this moment because I was already 2 laps behind them when a restart. Like I always do, I finished my race and I tried to give a good show to the spectators. I finished 11th.

Thanks to all my sponsors :

Marco
